Auth Portal Desk Level Procedure (DLP) Provider Search

3. High-level Description:

This Desk Level Procedure (DLP) supports Auth Portal users submitting new authorization requests through the portal. It explains how to perform an Advanced Provider Search when the provider is not found using the Quick Search function.

4. Detailed Steps:

4.1 Navigate to Provider Fields in a New Authorization Request

Please see the Provider Details Section of the following Auth Portal Desk Level Procedures (DLPs) for instructions how to submit a new authorization request that includes instructions how to navigate to the Provider data fields and perform the (provider) Quick Search functionality.

- HSCSN_Auth Portal_Submitting an Inpatient Request
- HSCSN_Auth Portal_Submitting an Outpatient Request

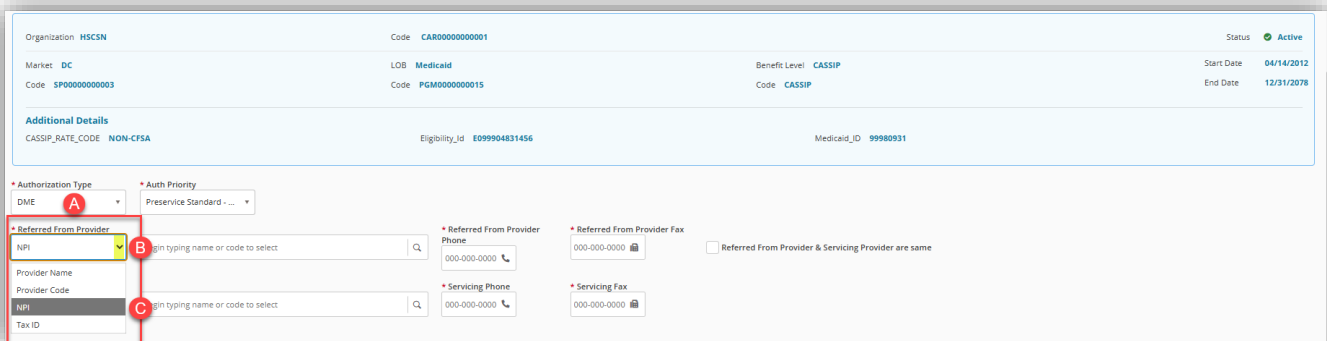

4.2 How to Enter Provider Data Using the Advanced Search Function

This option is only needed when the Quick Search does not find the targeted provider.

Note: HSCSN requires Auth Portal users to use the provider/facility Group NPI number and physical address to search for providers. The physical address is where the services are provided.

Note: Since the submitter should be the Rendering/Servicing Provider/Facility this DLP is focused on finding the Referred From Provider; however, the same steps apply for any Advanced Provider Search in the Auth Portal.

- Navigate to the Referred From Provider field
- Click the caret to open a drop-down list
- Select NPI
